Executive summary

The published dashboard unifies marketing, sales, and support views across three sheets. Quick Chat mat

The published dashboard unifies marketing, sales, and support views across three sheets. Quick Chat matched the marketing and support dashboard values. The Topic win-rate response exposed a real 81.51% versus 63.1% discrepancy that must be corrected before executive use.

Data strategy and insights

CRM is the anchor and account_id is the shared key. Marketing Funnel reports 22.41% dashboard respons

CRM is the anchor and account_id is the shared key. Marketing Funnel reports 22.41% dashboard r esponse rate; Direct Mail leads at 62.74%. Customer Health reports 3,000 tickets: 1,500 low, 1, 050 medium, 400 high, and 50 critical. Baseline CRM win rate is 315/499 = 63.1%.

AI analysis and actions

Topic: NovaTech Revenue Intelligence. Campaign and support questions matched the dashboard. The wi

Topic: NovaTech Revenue Intelligence. Campaign and support questions matched the dashboard. The win-rate answer was partially inconsistent, so the calculated field must use the correct distinct CRM grain. Recommended actions: correct Win Rate, re-run Q, add 3-5 visible dashboard annotations, and re-export final evidence.

Limitations and recommendation
